Greeting, 1905.

SEDALIA, MO., January 1st, 1905.

DEAR FRIENDS—At the beginning of a New Year, promising to be the brightest and most prosperous of any yet, we are pleased to present you with our **NEW AND ENLARGED GARDEN, FARM AND POULTRY ANNUAL** for 1905, describing The Best Seeds and Bulbs Grown, at right prices; also the most complete and largest stock of **BEE AND POULTRY SUPPLIES** in the West. We have just closed the most profitable year of our existence with a wonderfully large list of orders from both new and old customers which has prompted us to add many new and valuable seeds and supplies for 1905. We thank our friends for their kindness and liberal orders in the past, solicit your future patronage and ask you to kindly have your friends send their orders with yours this season for **ARCHIAS' "SURE SEEDS"** and **SUPPLIES**—a favor which we will appreciate. Heartily wishing you a prosperous New Year we are,

Respectfully yours,

L. H. ARCHIAS.

ARCHIAS' SEED STORE.

Advantages We Offer.

Sedalia (Home of the Missouri State Fair), with a population of twenty thousand, is situated in one of the finest farming sections of Missouri, with good shipping facilities, low freight and express rates.

We have railroads running in six directions, and more than twenty daily mails.

WE OWN THE FINEST AND BEST EQUIPPED STORE BUILDING and warehouse in the West and have no rent to pay. Our cost for labor and advertising is about half that of houses in larger cities, therefore, we can sell the **best seed grown** lower than other houses in our line.

OUR SEEDS ARE SELECTED especially to meet the demand of Market Gardeners and Good Farmers, and are good enough for anyone, this having been our business for over twenty years.

OUR RESPONSIBILITY—We refer, by permission, to the Citizens' National Bank or to any Express or Railroad Office in Sedalia. Thousands trust their orders with us each year. Your banker will tell you we are reliable.

FREE SEEDS—We will give away 100,000 packets free seeds to our customers this year as premiums. The larger the order the more free seeds you get. Have your neighbors order with you. It will pay you.

CASH PRIZES—On page 2 we give a list of prizes offered to our customers this season. We will sell you only the **FINEST SEEDS GROWN** and want you to raise big crops and fine specimens. This pays you, and advertises us. We want every one of our customers to compete for these prizes in 1905. We will publish a list of winners of our prizes in our 1906 catalogue.

WE DOUBLE TEST all Seeds, both as to vitality and purity, and we can conscientiously recommend Archias' Northern Grown "Sure Seeds" as Money Growers and Mortgage Lifters.

To Produce a Good Lawn—Plow or dig up the surface thoroughly to a depth of twelve to fourteen inches and mix the soil with well-rotted ma-

nure or our Helmet Brand Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

THE GREATEST WONDER OF THE AGE

PENCILLARIA

ZEAOIDES.

Yields 100 Tons Green Feed or 3,000 Pounds Seed to Acre. Grows Anywhere.

No forage plant that will give as heavy yields of forage as will Mand's Wonder Forage Plant. In all sections of this country where corn can be grown, this will certainly supplant as a forage sorghum, kaffir corn and milo maize.

It is Easier to Grow Than Corn or any other forage crop, producing a large amount of fodder at a cost of less than 50c a ton. When grown for seed it must have ample space to grow and plants should stand 2 to 3 feet apart in rows 3 to 3½ feet apart. Cultivate twice if possible, and by the time the plants are three months old they will astonish the grower. They will be from 12 to 14 feet high and average 40 stalks to each plant and 20 Seed Heads, which are 12 to 24 inches long and covered with seeds. Besides giving a very large crop of fodder, it will yield from 2,500 to 3,000 pounds of seed per acre. The seed is unequalled for poultry, and will ripen in any climate that will ripen corn. We say to one and all that you cannot possibly afford not to try some of this wonderful food producing plant, so we urge you if you have your own best interests at heart to try a field of this great plant this season. One pound of seed plants an acre. We offer the only true variety: Reduced Prices: 1 oz package 10c, ¼ lb 15c, 1 lb 45c, 5 lbs \$2, postpaid; 10 lbs by express \$3. Order early as our supply is limited.

VENEERED TREE PROTECTORS.

Our Improved Tree Protectors are made from Wood Veneer 10 inches wide and 20 inches long.

The Tree Protector should be soaked in water before applying to prevent splitting, and then wrapped about the tree. A wire or string should then be fastened around the protector to keep it in its place.

If a small slit is cut downward on one edge of the protector, about midway, and the wire or string is permitted to drop down this slit, it will permanently keep the protector in place and prevent the fastening from dropping down.

Helmet Brand Complete Fertilizers!

Heretofore the farmers in this vicinity have questioned the wisdom of the use of fertilizers, contending that fertilization was not essential to the growing of paying crops.

The intelligent and prosperous farmer of the present day is certain to be one who fully believes in and practices the excellent motto: **FEED THE SOIL AND THE SOIL WILL FEED YOU.** Crops cannot live and thrive on air and water alone. Their roots penetrate the earth and absorb therefrom the nitrogen, Phosphoric Acid, Potash or other elements of plant life they require. In some form these must be replaced, otherwise the land would eventually revert to that deplorable condition usually described as "worn out." Our fertilizers will build up your land. We Guarantee All Our Helmet Brand Fertilizers to Be Made Wholly from Animal Flesh, Blood and Bone.

Stable manure is a true fertilizer—all of its plant food, viz: Phosphoric Acid and Nitrogen, is available to the plants—but it cannot compare in strength with the Animal Fertilizers.

Stable manure contains 1,600 pounds of water to the ton, or more than ten times as much as the Animal Fertilizers.

It takes 30 to 40 cords of stable manure to equal the plant food found in one cord of Animal Fertilizers.

It takes vastly more labor to apply stable manure than to apply equal strength in Animal Fertilizers.

Pure Bone Meal for Roses, Pot Plants and Lawns. It is ground fine and contains no odor; 1 lb 5c, 10 lbs 30c, 50 lbs \$1, 100 lbs \$1.75.
Raw Bone Meal, 50 lbs \$1, 100 lbs \$1.75, 200 lbs \$3.25.

Stable manure for lawns is objectionable in appearance, odor, weed seed and cost. Our Lawn Fertilizer overcomes all these, and supplies the soil with requisite food for a luxuriant growth of grass. 10 lbs 40c. 25 lbs 75c, 50 lbs \$1.50, 100 lbs \$2.50.

NITRATE OF SODA.

Nitrate of Soda is not a substitute for other manures, but if your object is to grow maximum crops you must in some way furnish the plants with nitrate. No matter what manure or fertilizer is used the Nitrogen must be converted into Nitrate before the plants can use it. Apply 100 to 200 lbs per acre to garden crops. 10 lbs 50c, 25 lbs \$1.15, 100 lbs \$4.25, 200 lbs \$7.50.

ARMOUR'S FLOWER FOOD.
